Problem Statement

Traditional resumes and certificates do not show practical skills. A digital portfolio explains abilities more effectively. It gives an interactive and dynamic way to present work. Employers can directly check projects and skills. This solves the limitation of paper resumes.

Madhan MG

Project Overview

Summary: I created a digital portfolio using HTML, CSS, and JavaScript. External files were added for styling and functionality. A simple and clean design makes navigation easy. The theme used is royal blue for a professional look. Hamburger menu allows quick navigation.

Tools and Technologies

Tools Used: HTML5, CSS, JavaScript, Chrome, CodePen. Techniques: Semantic tags like <nav>, <footer>, <header>. External CSS for styling and layout. JavaScript used for validation and navigation. Responsive design tested across devices.

Communication Tools

These technologies facilitate interaction and information sharing, allowing individuals and groups to collaborate and connect regardless of location.

Automation & Efficiency Tools

Technology can automate repetitive or manual tasks, increasing speed and accuracy while reducing costs and freeing up human resources for more complex activities. Examples include automated manufacturing systems and digital process management software.

Portfolio Design and layout

I had used CSS for the styles and font colors. I used Royal Blue theme for my digital portfolio. And I used css box property to mention my projects. I used navigation menu which scrolls smoothly to the sections. I highlight my career goal. I used CSS media queri to create a responsive design which was used for both mobile friendly and desktop site. And also the sections are equally spaced it will help the viewer to easily read. My digital portfolio balances ssimplicity and professionalism.

Social Media Marketing Content
